Journal of Comparative Physiology A

Sensory, Neural, and Behavioral Physiology

Volume 183 1998

Founded in 1924 by K. von Frisch and A. Kühn, Volumes 1–29 (1934) under the title "Zeitschrift für wissenschaftliche Biologie. Abt. C: Zeitschrift für vergleichende Physiologie". Volumes 30–76 (1972) published as "Zeitschrift für vergleichende Physiologie". Volumes 77–92 (1974) published under the title "Journal of Comparative Physiology". Beginning with Volume 93 (1974) called "Journal of Comparative Physiology A · Sensory, Neural, and Behavioral Physiology / B · Metabolic and Transport Functions". Beginning with Volume 123 (1978) Section B called "Biochemical, Systemic, and Environmental Physiology". Beginning with Volume 154 (1984), this journal was divided into two separte journals, A and B.

Honorary Editor

H. Autrum · Munich

Editorial Board

F. G. Barth · Vienna (*Editor-in-Chief*)
B. J. Frost · Kingston, Ont.
J. G. Hildebrand · Tucson, Ariz.
P. M. Narins · Los Angeles, Calif.
G. Neuweiler · Munich

Advisory Board

A. M. Angioy · Cagliari
K. Aoki · Tokyo
H. Bennet-Clark · Oxford
J. K. Bowmaker · London
J. Camhi · Jerusalem
F. Clarac · Marseille
J.A. Coles · Bordeaux
E. Eguchi · Yokohama
N. Elsner · Göttingen
A. French · Halifax, N.S.
R. Hardie · Cambridge, UK
H. Hatt · Bochum
F. Huber · Seewiesen
R. Hudson · Mexico City
M. Konishi · Pasadena, Calif.
M. F. Land · Brighton
S. Laughlin · Cambridge, UK
M. Lehrer · Zurich
E. E. Marder · Waltham, Mass.
A. Michelsen · Odense
W. R. A. Muntz · Clayton/Melbourne
D.-E. Nilsson · Lund
K. Pearson · Edmonton
M. V. S. Siegler · Atlanta, Ga.
D. G. Stavenga · Groningen
N. J. Strausfeld · Tucson, Ariz.
D. Varjú · Tübingen
R. Wehner · Zurich
T. J. Wiens · Winnipeg, Man.
H. H. Zakon · Austin, Tex.

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that is publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), all translation rights as well as the rights to publish the article in any electronic form. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-7594, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents

Almaas TJ → Berg BG
Andreini I → Freitag J
Anton S → Ignell R
Arbas EA → Belanger JH
Assad C, Rasnow B, Stoddard PK, Bower JM: The electric organ discharges of the gymnotiform fishes: II. *Eigenmannia* 419

Baba Y → Kumagai T
Baba Y → Shimozawa T
Balakrishnan R → Pollack GS
Belanger JH, Arbas EA: Behavioral strategies underlying pheromone-modulated flight in moths: lessons from simulation studies 345
Bell WE, Karstens W, Sun Y, Van Houten JL: Biotin chemoresponse in *Paramecium* 361
Bennett ATD → Vorobyev M
Berg BG, Almaas TJ, Bjaalie JG, Mustaparta H: The macroglomerular complex of the antennal lobe in the tobacco budworm moth *Heliothis virescens*: specified subdivision in four compartments according to information about biologically significant compounds 669
Bernays EA, Chapman RF: Phenotypic plasticity in numbers of antennal chemoreceptors in a grasshopper: effects of food 69
Bjaalie JG → Berg BG
Blagburn JM → Hill ES
Bower JM → Assad C
Bräucker R → Neugebauer DC
Breer H → Freitag J
Bromage NR → Randall CF
Byzov AL → Vedenina VY

Campenhausen M v, Kirschfeld K: Spectral sensitivity of the accessory optic system of the pigeon 1
Caveney S → McIntyre P
Chapman RF → Bernays EA
Chen QC → Jen PH-S
Coelho JR: An acoustical and physiological analysis of buzzing in cicada killer wasps (*Sphecius speciosus*) 745
Conley RA, Coombs S: Dipole source localization by mottled sculpin. III. Orientation after site-specific, unilateral denervation of the lateral line system 335
Coro F, Kössl M: Distortion-product otoacoustic emissions from the tympanic organ in two noctuoid moths 525
Coombs S → Conley RA
Cromarty SI, Derby CD: Inhibitory receptor binding events among the components of complex mixtures contribute to mixture suppression in responses of olfactory receptor neurons of spiny lobsters 699
Cuthill IC → Vorobyev M

Danaceau JP, Lucero MT: Betaine activates a hyperpolarizing chloride conductance in squid olfactory receptor neurons 225
Denzinger A, Schnitzler H-U: Echo SPL, training experience, and experimental procedure influence the ranging performance in the big brown bat, *Eptesicus fuscus* 213
Derby CD → Cromarty SI
Douglass JK, Wilkens LA: Directional selectivities of near-field filiform hair mechanoreceptors on the crayfish tailfan (Crustacea: Decapoda) 23
Drummond JM, Macmillan DL: The abdominal motor system of the crayfish, *Cherax destructor*. I. Morphology and physiology of the superficial extensor motor neurons 583
Drummond JM, Macmillan DL: The abdominal motor system of the crayfish, *Cherax destructor*. II. Morphology and physiology of the deep extensor motor neurons 603
Dudel J → Schramm M
Dunlap KD, Thomas P, Zakon HH: Diversity of sexual dimorphism in electrocommunication signals and its androgen regulation in a genus of electric fish, *Apteronotus* 77
Dyer AG: The colour of flowers in spectrally variable illumination and insect pollinator vision 203

Elsner N → Heinrich R
Erber J, Kierzek S, Sander E, Grandy K: Tactile learning in the honeybee 737

Franchina CR, Stoddard PK: Plasticity of the electric organ discharge waveform of the electric fish *Brachyhypopomus pinnicaudatus* I. Quantification of day-night changes 759
Freitag J, Ludwig G, Andreini I, Rössler P, Breer H: Olfactory receptors in aquatic and terrestrial vertebrates 635
Friedrich A, Teyke T: Identification of stimuli and input pathways mediating food-attraction conditioning in the snail, *Helix* 247

Giurfa M → Reisenman CE
Giurfa M, Vorobyev M: The angular range of achromatic target detection by honey bees 101
Givois V → Pollack GS
Glendinning JI, Valcic S, Timmermann BN: Maxillary palps can mediate taste rejection of plant allelochemicals by caterpillars 35
Grandy K → Erber J
Grant AJ, Riendeau CJ, O'Connell RJ: Spatial organization of olfactory receptor neurons on the antenna of the cabbage looper moth 433
Grosclaude FE, Núñez JA: Foraging pauses and their meaning as an economic strategy in the honeybee *Apis mellifera* L. 61

Hansson BS → Ignell R
Hariyama T → Terakita A
Hariyama T, Terakita A, Sakayori M, Katsukura Y, Ozaki K, Tsukahara Y: Chromophore distribution and ultraviolet visual pigment in the compound eyes of the Japanese fireflies *Luciola cruciata* and *L. lateralis* (Coleoptera, Lampyridae) 165
Heinbockel T, Hildebrand JG: Antennal receptive fields of pheromone-responsive projection neurons in the antennal lobes of the male sphinx moth *Manduca sexta* 121
Heinrich R, Rozwód K, Elsner N: Neuropharmacological evidence for inhibitory cephalic control mechanisms of stridulatory behaviour in grasshoppers 389
Hemmi JM, Mark RF: Visual acuity, contrast sensitivity and retinal magnification in a marsupial, the tammar wallaby (*Macropus eugenii*) 379
Hetherington TE → Lindquist ED
Hildebrand JG → Heinbockel T
Hill ES, Blagburn JM: Indirect synaptic inputs from filiform hair sensory neurons contribute to the receptive fields of giant interneurons in the first-instar cockroach 467
Hoy RR → Robert D
Hsiao HS, Payne R: Light-induced Mn^{2+} influx in *Limulus* ventral photoreceptors 193
Huang Z-Y, Plettner E, Robinson GE: Effects of social environment and worker mandibular glands on endocrine-mediated behavioral development in honey bees 143

Ignell R, Anton S, Hansson BS: Central nervous processing of behaviourally relevant odours in solitary and gregarious fifth instar locusts, *Schistocerca gregaria* 453

Jen PH-S, Chen QC, Sun XD: Corticofugal regulation of auditory sensitivity in the bat inferior colliculus 683
